

MOHAMED RASHEED M

Full Stack Engineer

+91-9787479848 | mdrashee7272@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

Full Stack Engineer with 1.5+ years of experience in Python, FastAPI, and PostgreSQL, focused on building efficient backend systems. Proficient in API development, database design, and delivering scalable end-to-end web solutions. Experienced in integrating backend services with frontend applications and handling real-time data workflows.

EDUCATION

BACHELOR OF TECHNOLOGY IN INFORMATION TECHNOLOGY

- AL - Ameen Engineering College 2020 – 2024
CGPA: 7.80/10

EXPERIENCE

Full Stack Engineer – Cloud Garage LLP Nov 2024 – Present

- Designed and maintained 15+ RESTful APIs using Python and FastAPI for scalable backend services.
- Structured and refined PostgreSQL databases, improving data retrieval efficiency and application performance.
- Connected backend services with frontend applications to enable seamless real-time data flow.
- Applied real-time processing features that enhanced application responsiveness and user experience.
- Streamlined backend performance by debugging critical issues and improving system reliability.

PROJECTS

Vivagham Singapore Mar 2024 – Mar 2025

Client: Singapore

- Contributed as a backend developer in building a full stack matrimony platform supporting user profile and matchmaking workflows.
- Developed authentication and profile management services using Python and FastAPI.
- Created multi-step profile workflows with admin approval logic to streamline onboarding processes.
- Designed APIs for search, filtering, and connection requests, improving platform usability and engagement.
- Configured privacy controls, email notifications, and subscription handling to enhance user experience and platform functionality.

Label Generator Dashboard – Centralized Integration System Apr 2025 – Aug 2025

Client: EMD, Kimberfeel (France)

Integration: Mirakl – SRP

- Created scalable backend services using Python and FastAPI to support centralized integration workflows.
- Structured and enhanced PostgreSQL databases for reliable and efficient data handling.
- Connected REST APIs between Mirakl and SRP systems, enabling smooth cross-platform communication.
- Linked backend services with frontend applications to deliver end-to-end functionality.
- Streamlined real-time data processing to improve system responsiveness and operational performance.
- Automated backend workflows, reducing manual effort and increasing overall system efficiency.

AutoCloud - Infrastructure Automation Dashboard

Sep 2025 – Present

Client: Internal

- Built an internal infrastructure automation platform to streamline cloud resource provisioning across AWS, Azure, and GCP in collaboration with the DevOps team.
- Constructed backend APIs using Python and FastAPI to automate infrastructure provisioning workflows and reduce manual operational effort.
- Introduced validation and error-handling mechanisms, improving system reliability and provisioning accuracy.
- Unified backend services with frontend workflows to enable seamless user interaction and resource management.
- Supported development of a React.js-based interface for cloud resource creation, monitoring, and workflow management.
- Improved deployment efficiency by contributing to automation workflows that reduced repetitive configuration tasks.

TECHNICAL SKILLS

- **Frontend:** React.js, HTML, CSS, JavaScript, Bootstrap
- **Backend:** Python (FastAPI), Node.js, Express.js
- **Database:** PostgreSQL, MongoDB
- **Tools:** Git, GitHub, Docker
- **Concepts:** REST APIs, API Integration, Database Design, Responsive Web Design
